

MESH & WIRE PRODUCTS

## CONCRETE REINFORCEMENT

[WWW.DUCHESNE.CA](http://WWW.DUCHESNE.CA)

# OUTSTANDING QUALITY PRODUCTS

Founded in 1927, Duchesne et Fils has become a North American symbol of excellence in the building material market. From product design to production, from packaging to shipping, Duchesne is dedicated to maintaining the highest standards of quality at every step of production. Manufactured in a state-of-the-art facility, Duchesne products meet and exceed the ASTM A1064 standards.

## CONCRETE REINFORCEMENT PRODUCTS

Solidly assembled, Duchesne offers a wide range of concrete reinforcement products for North American users.

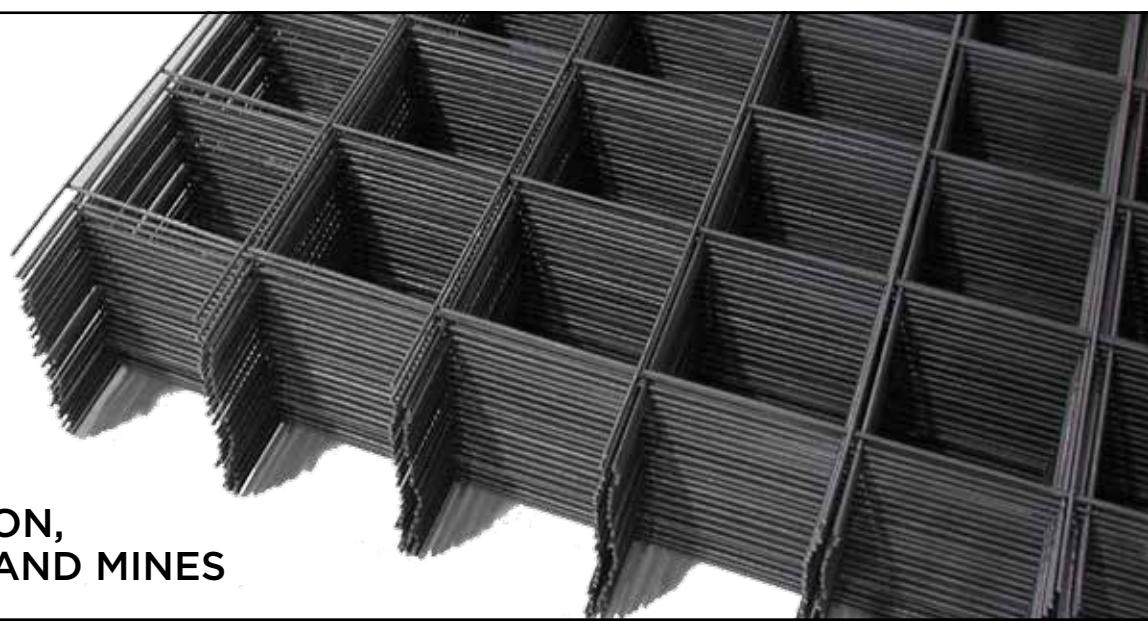

- Construction Mesh
- Structural Welded Wire Reinforcement
- Mine Mesh
- Concrete Pipe Mesh
- Continuous High Chairs
- Reinforcing Bars
- Wire Coils

- National distribution and warehousing capabilities
- Strong relations with **major retailers across Canada**
- **North American manufacturer** that has built its reputation on trust, stability, simplicity and reliability

# MESH PRODUCTS

FOR CONSTRUCTION,  
CONCRETE PIPES AND MINES

## CONSTRUCTION MESH

- Sheets and rolls
- Natural or galvanized wire
- Standard wire gauge (10, 9, 8, 6, 4, 2, 0)
- Variable spacing
- Manufactured according to the ASTM A1064 standard
- Custom sheets and rolls upon request

### *Applications*

- Concrete floors
- Driveways
- Septic tanks
- Manure pits
- Balconies

## MINE MESH

- Sheets with a flush finish to avoid cuts
- Natural or galvanized wire
- Standard wire gauge (9, 6, 4, 0)
- Variable spacing
- Manufactured according to the ASTM A1064 standard
- Custom sheets upon request

### *Application*

- Mine protective device attached to the vaults of tunnels.  
It ensures the safety of the miners while drilling and it retains the walls against falling rocks.

## STRUCTURAL WELDED WIRE REINFORCEMENT

- Custom sheets for concrete reinforcement
- Up to 10' widths and to 20' lengths
- From 10ga to W/D13
- Natural or galvanized wire
- Variable spacing
- Bending of the sheets upon request
- Manufactured according to the ASTM A1064 standard

### *Applications*

- Concrete floors
- Septic tanks
- Manure pits
- Civil applications (e.g. Bridge)
- Precast concrete

# MESH PRODUCTS

## CONCRETE PIPE MESH

- Rolls in lengths up to 1000'
- Variable spacing available
- From 10ga to W/D13 longitudinal wire
- From 10ga to W/D8 transversal wire
- Up to 3 convoluted wire
- Wind: regular or reverse
- Custom rolls upon request

### *Application*

- Concrete pipe reinforcement

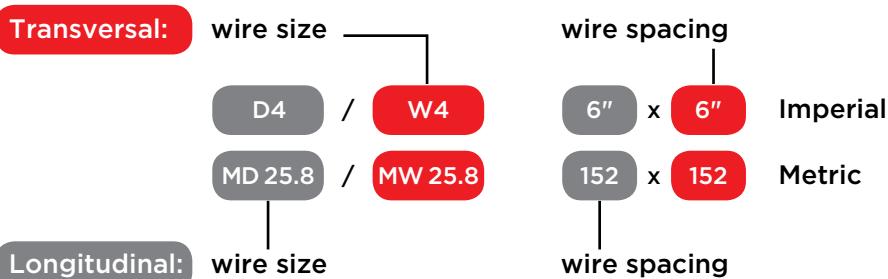

## STANDARD CONSTRUCTION MESH

WIRE SIZE	SPACING	SHEETS						ROLLS			
		4' x 7'	4' x 8'	5' x 10'	8' x 12'	8' x 14'	8' x 20'	5' x 100'	5' x 200'	6' x 100'	6' x 200'
10/10	6" x 6"	x	x	x				x	x	x	x
9/9	6" x 6"		x		x		x			x	x
8/8	6" x 6"						x				
6/6	6" x 6"		x		x		x			x	x
6/6	4" x 4"				x		x				
4/4	6" x 6"				x		x				
4/4	4" x 4"				x		x				
2/2	6" x 6"				x						
0/0	6" x 6"				x		x				
D8/D8	8" x 8"					x					
W5.8/W5.8	12" x 12"						x				
W6.8/W6.1	4" x 6"					x					

*Other gauges, spacing and formats available upon request*

### CONVERSION FACTORS

1 in.= 25,4 mm

1 ft= 0,3048 m

1 in.<sup>2</sup>= 645,2 mm<sup>2</sup>

1 in.<sup>2</sup>/lin. ft= 2116,7 mm<sup>2</sup>/m lin.

1 lb/100 ft<sup>2</sup>= 0,0488 kg/m<sup>2</sup>

1 lb = 0,4536 kg

1000 psi = 6,895 MPa

### WIRE SIZE

Imperial wire sizes are designated by their sectional area in hundredths of a square inch.

Ex.: for W8, Area = 0.08 in.<sup>2</sup>

Metric wire sizes are designated by their sectional area in mm<sup>2</sup>.

Ex.: for MW51.6, Area = 51.6 mm<sup>2</sup>

"W" denotes smooth wire

ex.: W13

"D" denotes deformed wire

ex.: D13

"M" denotes metric

ex.: MW83.88 or MD83.88

### MESH CONVERSION

Rebar Fy = 400 MPa

Deformed Mesh

Fy= 485 MPa, available up to 550 MPa

Example: Area reduction when converting Rebar Steel Area to Deformed Mesh, Fy = 500 MPa

For a saving of 20% of steel content Multiply by x 400/500 = 0.80

# CONCRETE ACCESSORIES

## CONTINUOUS HIGH CHAIRS

- From 1 1/2" to 8" high
- Available in 5' length
- Wire resistance superior to the ASTM A1064 standard

### *Applications*

- Supports mesh and rebar during installation
- Concrete floors
- Balconies
- Precast concrete

## FAST, EASY & ECONOMIC

Using continuous high chairs is a fast and easy way to install mesh and rebar. Greatly appreciated by the workers for being adjustable and light, the continuous high chairs are economic accessories for your concrete projects.

**CONCRETE  
REINFORCEMENT**

# WIRE PRODUCTS

FOR CONSTRUCTION,  
CONCRETE PIPES AND MINES

## REINFORCING BARS

- Offered in 10M and 15M
- Available in various lengths (2', 4', 6', 10', 20')
- W-grade (weldable) product
- Manufactured according to the CAN/CSA-G30.18 standard
- Custom lengths upon request

This product is intended for specific applications in which any of the following conditions are required:

- Improved weldability
- Increased ductility
- Restricted mechanical properties
- Restricted chemical composition

The reinforcing bars are mainly used to reinforce concrete. A few **applications** are:  
Concrete floors, driveways, concrete pipes, septic tanks, manure pits, and balconies.

## REINFORCING BARS SIZES

### CANADA

10M = 100 mm<sup>2</sup>= 0.155 in.<sup>2</sup>

15M = 200 mm<sup>2</sup>= 0.31 in.<sup>2</sup>

*American sizes available upon request.*

## WIRE COILS

- Available in 1000lb to 2000lb coils (standard is 1500lb)
- From W0.5 to W13 and D2.0 to D13 wire diameter
- Smooth or deformed wire
- Shipped on a tubular carrier
- Manufactured according to the ASTM A1064 standard
- Custom sizes and gauges available upon request

### *Application*

- Concrete pipe precaster with a cage machine
