TABLE OF CONTENTS

Presentation of the guide 3

Available shanks and finishes 4

GENERAL CONSTRUCTION & FRAMING 5

- 34° Paper strip nails 5-6
- 34° Paper strip joist hanger nails 7
- 28° Wire strip nails 8
- 21° Plastic strip nails 9
- 15° Wire collated coil nails 10-11
- 15° Wire collated siding coil nails 12

ROOFING 13

- Coil Roofing nails wire collated 13

FINISHING 14

- 23 gauge Headless pin nails 14
- 18 gauge Finishing brads..... 15-16
- 16 gauge Finishing brads..... 17-18
- 15 gauge (35°) Finishing nails..... 19
- 16 gauge "L" Type hardwood flooring cleat nails 20
- 15 gauge Hardwood flooring staples 21

16 GAUGE WIDE CROWN STAPLES 22

- 1" Wide crown - Bostitch type 22
- 15/16" Wide crown - Paslode type 22

16 GAUGE MEDIUM CROWN STAPLES..... 23

- 7/16" Medium crown - Senco type 23
- 1/2" Medium crown - Paslode type 24
- 1/2" Medium crown - Bostitch type 24

18 GAUGE NARROW CROWN STAPLES 25

- 1/4" Narrow crown - Senco type..... 25-26
- 1/4" (7/32") Narrow crown - Bostitch type..... 26
- 3/16" Narrow crown - Paslode type..... 27

SELF-SERVICE GUIDE

The different types of nails fall into nine categories, each with a distinct colour to make it easier and faster to locate them on the shelves. The colour scheme includes information to help find the right nails for specific projects. The following pages provide details on recommended **applications**, available **lengths** and **finishes**, the **quantity of nails and staples per box**, the **types of shanks** as well as the **diameter** of each nail and staple.

*Using this guide based on your **project**:*

- Use the grey stripes along the page margins to help you select the appropriate nails or staples for your project.
- Choose the nails and staples recommended for the pneumatic tool you will be using.
- Confirm your tool's compatibility using the list at the bottom of the page.
- Decide on the length of nail required.
- Select the appropriate shank style.
- Select the appropriate finish for your particular application.

*Using this guide based on your **pneumatic tool**:*

- Select the correct nails or staples for your nailer/stapler. Refer to the nine categories to know which type of nails or staples to choose.
- Confirm your tool's compatibility using the list at the bottom of the page.
- Decide on the length of nail required.
- Select the appropriate shank style.
- Select the appropriate finish for your particular application.

Top precision PRODUCTION

The physical characteristics of nails are continuously checked with the greatest precision. We have implemented rigorous quality standards, which are enforced daily through strict process controls. Samples are collected during the production process and are evaluated for, among other things:

- the angle of the nails
- the adhesiveness of the paper strips
- the sturdiness of the plastic and paper collators
- the symmetry of the nail coils

tp Top performance COATING

The nails are covered with a high-performance coating that increases their slip coefficient, maximizing speed of entry into the materials. The **top performance COATING** also improves nails resistance to removal by 15%.

**COMPATIBILITY
GUARANTEED**

Duchesne offers a replacement warranty on **Topgun Duchesne®** nails and staples against any manufacturing defect or incompatibility with nailers and staplers on the compatibility list.

Compatibility guaranteed with more than 2000 models of nailers and staplers.

AVAILABLE SHANKS

Smooth

- Easy penetration

Spiral

- Better hold
- Reduces the formation of cracks

Ringed

- Better hold

AVAILABLE FINISHES

We offer five types of finishes that allow you to choose the best suited **Topgun Duchesne®** nail to the job at hand.

Bright

The nail's natural finish. Ideal for indoor uses requiring no corrosion resistance.

Electro-galvanized

Finish resulting from a coating of zinc applied to nail through electrolysis. Ideal for indoor uses requiring minimal corrosion resistance.

Galvanized with dichromate

Finish obtained from the application of a coat of zinc covered with dichromate. Finish recommended when protected and slightly exposed to climatic conditions.

Hot dip galvanized

Finish obtained from immersion in a basin of molten zinc for superior corrosion resistance. Lends itself remarkably well to the full range of outdoor applications, including ACQ pressure treated lumber (alkaline copper quaternary).

Stainless steel

Excellent antirust metal. The ideal solution for exterior uses, including ACQ treated wood and exotic wood such as Red Cedar, Pine and Ipe.
