RESIDENTIAL & AGRICULTURAL STEEL PROFILES

WWW.DUCESNE.CA

EXCLUSIVE

colours

Several colours, known as cool roof colours, offer energy-efficient performances, especially in summer, by keeping buildings cool.

Steel profiles for ROOFING

TR 5

The TR 5 is the only double-rib profile. This feature provides **increased protection against water infiltration**, especially for low slope and long span roofs.

TR 7

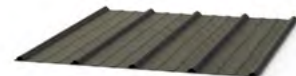

The TR 7 profile offers an **excellent coverage ratio** by taking full advantage of the width of the material before forming, making it a very economical profile. In addition, its visible fastener system allows a quick and easy installation which reduces costs and time.

TR 9

The design of the TR 9, with its ribs and grooves, **enhances the appearance of today's homes**. Its discreet lines and wide range of colours allow to create colour schemes in harmony with the entire property.

TR 80

The TR 80 is manufactured from a steel which is **superior for its hardness and strength** (grade 80), making it a robust profile in terms of load capacity and holding power. Reinforced ribs and intermediate grooves provide optimum strength and reduces the risks of oil canning..

AGRICULTURAL PROJECT

The elevated rigidity of the **TR 80** makes it an undeniable durable quality product for roofing and siding, perfect for **AGRICULTURAL** use.

Steel profiles for SIDING

Over 12 models of steel profiles for wall applications that give a distinctive style and durability to any type of building, including:

LC 15

The LC 15 wall profile design, with fine and regular 1/2" ribs, creates a distinctive and refined style for commercial and residential buildings.

LC 17

The LC 17 wall profile design imitates a board and batten and cut grooved wood siding, which allows to create a unique classic style.

LC 19

With discreet 1/2" ribs and slight waves between the ribs, the LC 19 wall profile gives the appearance of an 8" vertical siding, a reminder of the popular wood sidings of yesteryear.

For our complete line or for further information about Duchesne steel profiles, visit our website WWW.DUCHESNE.CA.

3X MORE DURABLE
than traditional asphalt shingle roofs

DURABLE AND PRACTICALLY MAINTENANCE-FREE
