

# HARMONY™

**Introducing our new aluminum siding. It is unique, resistant, durable, and allows for easy installation at a lower cost than steel or wood.**

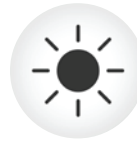

This is a solution for homeowners looking to enhance their living space, while preserving the value of their property. Harmony provides versatile possibilities for transforming any space - whether you prefer a horizontal, vertical, or diagonal installation for a revamp of your entire house or for a striking addition to a specific area.

## Advantages

### Click&Go system

Exceptional design for secure mounting and one-step installation. Cost-effective and quick to install.

### UV protection

Powder-coating technology with UV protection. Will not fade.

### Easy to install

Requires only one person.

### Waterproof and rot-proof

Non-Porous. Does not rot or present mildew.

### Lightweight aluminum

High quality and lightweight; 50% lighter than wood-finished steel products and 70% lighter than engineered wood siding.

### Maintenance free

Only needs to be cleaned with water occasionally.

### No specialised tools and no silicone\* required

Easy to cut; no need for a steel saw.  
\*No silicone needed to fix panels.

### Resistant

Resists distortion, stains, corrosion, insects, rodents and pests. Resistant to temperature variations, offering excellent stability in our climate.

### Natural wood appearance

Offers a unique variety of sought-after shades in a realistic wood finish, without the maintenance of wood.

### 100% recycled and recyclable

For us, every material and action counts in preserving our planet and building a sustainable future.

### High-quality aluminum

High-quality and robust 0.032" aluminum compared to the market standard at 0.027". Excellent durability and long-term investment.

### Made in Canada

By a local company for local people.
